Industry Update: Weather Conditions Affecting Operations at George Airport (FAGG)

ATNS wishes to inform the aviation industry and all relevant stakeholders that George Airport (FAGG) is currently experiencing significant rainfall. This adverse weather is impacting airport operations.

Runway Status:

- **Runway 29 (RWY 29):** Although RWY 29 has a valid flight procedure, it is currently unserviceable due to prevailing wind conditions. This may result in flight delays and potential diversions.
- **Runway 11 (RWY 11):** The flight procedure for RWY 11 was submitted to the South African Civil Aviation Authority (SACAA) for approval and upliftment yesterday. We are expecting an outcome soon.

We are closely monitoring the situation and will provide updates throughout the day as conditions evolve. Your understanding and cooperation are appreciated during this time.

Issued by the Air Traffic and Navigation Services (ATNS) SOC Ltd
