Media Statement

**Flight disruptions at George Airport due to severe inclement weather conditions**

Air Traffic and Navigation Services (ATNS) SOC Ltd would like to notify stakeholders including passengers that George Airport is currently experiencing flight disruptions due to severe inclement weather conditions.

The region is currently experiencing rains with a low cloud base, coupled with strong winds that favour the use of Runway 11, whose Instrument Landing System (ILS) flight procedure is still under maintenance.

In the meantime, the impact of these conditions resulted in the implementation of flight diversions that affected two airlines, FlySafair and Airlink.

ATNS regrets the inconvenience caused by these unforeseen flight disruptions.
