1. SECTION A: INTRODUCTION AND BACKGROUND

1.1. Background and Introduction

The Air Traffic and Navigation Service Company Limited (ATNS) is a State-Owned Company (SOC), established in 1993 in terms of the ATNS Company Act (Act 45 of 1993) to provide air traffic management solutions and associated services on behalf of the State. These services accord with International Civil Aviation Organisation (ICAO) standards and recommended practices, and the South African Civil Aviation Regulations and Technical Standards. As an air navigation services provider (ANSP), ATNS is governed by the nation's legislative and administrative framework.

ATNS is also a commercialised ANSP operating on the “user pays” principle that relies on current revenues and debt funding for its operational and capital expenditure requirements.

Our business offerings are divided into Regulated and non-regulated activities:

Regulated Business

At present 90% of ATNS's revenue is facilitated through its regulated business:

Air navigation services and infrastructure

The principal activities of ATNS's regulated business encompass the planning, operating and maintenance of safe and efficient air traffic management services in the airspace for which the State is responsible. Airspace infrastructure consists of the following main components:

- Communications, navigation, and surveillance (CNS) infrastructure.
- Auxiliary aviation services, such as aeronautical information publications, flight procedure design and aeronautical surveys.
- Air traffic management.

ATNS's infrastructure development is informed by user expectations and regulatory requirements at a global level; as well as the needs of the air traffic management (ATM) community and new enabling technologies.

Air traffic service charges

As a monopoly service provider, ATNS is regulated economically by the Economic Regulating Committee (RC) that is a statutory body formed and appointed by the Shareholder, the Department of Transport (DoT). The RC is empowered by the ATNS Company Act (Act 45 of 1993) to issue permission to ATNS. The permission regulates the increase in specified tariffs that ATNS can issue and lays down minimum service standards requirements for the regulated business. ATNS is, through the permission, authorized to levy air traffic service charges on users (aircraft operators) for the use of air navigation

infrastructure and/or the provision of an air traffic service. The permission has a five-year life span.

Training institution

ATNS runs a successful training institution as a division within the Company, namely: the Aviation Training Academy (ATA). The ATA provides a full range of air traffic services training, technical support training and related training to delegates in South Africa and the broader African continent in the disciplines of engineering, air traffic services and management. The ATA is an ISO9001:2000 accredited institution and has international cooperation agreements in place with partners, enabling the academy to maintain mutually beneficial partnerships in the presentation and accreditation of international courses in air traffic services (ATS). The ATA is a world-renowned academy, and in both 2012 and 2013 was formally recognized as the International Air Transport Association (IATA) Worldwide Top Regional Training Partner.

Non-Regulated Business

ATNS's non-regulated business currently contributes 10% of the Company's revenue. The non-regulated business encompasses a long-term strategy to facilitate regional expansion through a subsidiary vehicle presently known as "ATNS International". ATNS International will enable the Company to take a more robust and agile stance in the non-regulated business market without posing undue risks to its regulated market and Shareholder. It will also enable ATNS to enter joint ventures and partnerships with external suppliers so that the Company can harness more valuable market opportunities and extend its regional influence and reach.
